Tirupur-641601, Tamil Nadu, India

SKILLS

- **Languages:** Python, Javascript, Flutter, Java, NodeJs, Go,
- **Technologies & Tools:** MongoDB, Flask, Django, HTML, CSS, jquery, Github, Wordpress, Node-red, Docker, PowerBi

EXPERIENCE

- **Ofella innovation**  Aug 2024 - present
Software Developer Punjab, India-Remote
 - * Engineered the Android application for the VMS, enabling remote CCTV monitoring, playback, and alert notifications, improving accessibility for on-the-go users.
 - * Optimized cross-platform integration between the VMS web portal, Android app, and MNVR devices, ensuring seamless synchronization of video streams and user data.
 - * Enhanced user experience and reliability by implementing secure APIs, offline support, and push notifications in the Android VMS app.
 - * Implemented advanced security features such as encrypted video streaming, role-based access control, and secure authentication across VMS web and Android applications.
 - * Streamlined deployment and maintenance of VMS and WordPress platforms using CI/CD pipelines and cloud hosting, reducing downtime and improving scalability.
- **Industrial Soft Solutions & Systems**  Jan 2023 - Dec 2023
Full Stack Developer Chennai, India
 - * The system can track body posture in real-time and provide feedback to prevent poor ergonomics, reducing the risk of musculoskeletal disorders.
 - * By detecting improper sitting or standing positions, the system helps improve workplace safety and ensures employees maintain proper posture, enhancing comfort and productivity.
 - * The system can continuously collect posture data, helping organizations analyze trends and implement ergonomic improvements based on real insights.
 - * Using OpenCV and MediaPipe provides a low-cost, software-based alternative to expensive motion tracking hardware, making it scalable for different environments like offices, factories, and healthcare settings.
 - * Python, Flask, opencv, Mediapipe, MongoDB, YOLO

EDUCATION

- **Nandha Arts and Science College** 2018 - 2021
B.COM(Computer Application) Erode, India
 - * Percentage: 60.2/100

PROJECTS

- **Data swaping: [Data analysis from anywhere throw notification]** Aug 2022 - Nov 2022
Tools: [Python,mysql,Php,Firebase] 
 - * Developed a Server based project for owner check the current organization status,transactions,bookings and offline /online analysis. server side is php and client is python for anywhere we can see the status of the business

CERTIFICATIONS

- **Completed Python Full Stack developer at Qtree Technologies** Apr 2022-Oct 2022
